NEWS RELEASE

Carraig Insurance benefits from even better uptime on SQL Server 2012

The motor fleet insurance specialist is the first of RDT's clients to migrate

RDT is pleased to announce the first migration of a client on to Microsoft's SQL Server 2012.

SQL Server is a cloud-ready information platform enabling outstanding uptime, analytics and speed.

Insurer Carraig is just the first of RDT's 18 clients to make the move. The leading motor fleet insurer is also live with RDT's flagship insurance software package Landscape – version 3.1.0.5.

RDT's CEO Mark Bates said, "Carraig are benefitting now from better performance, returning policies even faster than before. They also operate in the security of enhanced uptime availability.

"We're looking forward to making these benefits available to the rest of our client base, as we roll out the migration programme."

ENDS

About RDT

RDT's (www.rdt.co.uk) flagship packaged software solution Landscape is the industry standard in UK general insurance.

The efficiencies provided in Landscape have delivered customers operational savings of 20 per cent, enabled significant headcount reduction, doubled policies handled, and reduced process turnaround by 75 per cent. New products can be released to market in days rather than weeks.

RDT's cloud-based ratings engine was the first UK solution enabling real-time pricing – so insurers quote the most appropriate premium to customers, making sophisticated decisions to stay profitable in an increasingly competitive environment.

Renowned for innovation, RDT launched real-time policy placement in 1995, and the first rating engine in the cloud in February 2011. The company prides itself on a lifelong reputation for delivering on time and on budget. The team approaches customer partnerships with a long-term strategic view – supporting ongoing client growth and success.

With this in mind, RDT re-invests 30 per cent of turnover into R&D, ensuring all customers constantly benefit by ongoing enhancements.

RDT's Landscape solution is the UK's most popular, used by 18 insurers including Direct Line Group (formerly RBS), Towergate, RAA, Provident, Canopius, Equity and Markerstudy.

RDT extended its global reach in 2010, opening its first Australian office.
